

FREE SAMPLE · 3 OF 26 PAGES

Renter Layout Kit

Plan your room on paper before you lift a chair.

NO DRILLING

NO BUYING

10-MINUTE MOVES

EXAMPLE: STUDIO, ONE CHAIR MOVED, 36-INCH PATH

WHAT'S INSIDE

- 6 floor-plan grids, 1/4 in = 1 ft
- 3 furniture cut-out sheets to scale
- 12 renter-safe moves, checklist
- 4 room fix sheets
- 2 measure-and-note pages
- 1 guest-ready 10-minute plan
- 1 New Year reset, 5 moves
- 1 before / after tracker
- 1 before / after photo frame to share
- + Myth or Tradition cheat sheet

No drilling. No buying. Just move what you already own. Each move names the practical design reason (walking path, sight line, light) and the classic feng shui idea in plain English.

This free sample: the cover, the studio grid and checklist moves 1-3.

The full kit adds 5 more grids, 3 furniture cut-out sheets, moves 4-12, 4 room fix sheets, measure pages, a guest-ready plan, a New Year reset, a before/after tracker and the Myth or Tradition cheat sheet. Find it at fengshuifix.com.

Print at 100% / Actual size (not "Fit to page"). This square should measure exactly 1 inch. Then 1 grid square = 1/4 inch = 1 foot, and the cut-outs match the grids. Black-and-white printing works fine.

A layout planner for design and comfort. It makes no promises about luck, money, health or sleep. Check your lease before moving heavy furniture, and lift with a second person.

FLOOR-PLAN GRID · 1 SQUARE = 1 FOOT

Studio apartment

Tip. Typical US studio: 400-550 sq ft. Mark three zones: sleep, sit, work. Keep the bed out of the straight view from the front door.
Print at 100% / Actual size. The square at left should measure exactly 1 inch, so every grid square is 1/4 inch = 1 foot and the cut-outs match.

THE 12-MOVE CHECKLIST · PAGE 1 OF 4

Moves 1-3

MOVE 01 Clear the door swing

ENTRYWAY 5 MIN 1 PERSON

Move: Lift shoes, bags and baskets out of the arc the front door swings through. Give them one spot just past it, along the side wall.

Why it works: The door swing is where clutter collects first. A clear 3-foot landing lets you walk in with groceries without a shuffle.

The classic rule: Traditional feng shui treats the entrance as the mouth of the home and keeps it open.

Skip if the door opens onto a clear hall already.

My note

☐ Done Date _____ Feels better? (1) (2) (3) (4) (5)

MOVE 02 Mirror to the side wall

ENTRYWAY 5 MIN 1 PERSON

Move: If a mirror hangs or leans straight across from the front door, move it to a side wall, parallel to the way you walk in. Use a hook or nail that is already there, or lean it.

Why it works: A side-wall mirror widens a narrow entry. One facing the door just shows you a second door.

The classic rule: A mirror should not face the front door.

Skip if there is no mirror near the door.

My note

☐ Done Date _____ Feels better? (1) (2) (3) (4) (5)

MOVE 03 Open a 36-inch path

WHOLE HOME 10 MIN 1 PERSON

Move: Walk from the front door to the window and to your main seat. Slide whatever pinches the route (a chair, a basket, a plant) to the side until the path is about 36 inches wide.

Why it works: 36 inches is the minimum clear width the US ADA standards use for an accessible route. Below it you squeeze past instead of walking through.

The classic rule: Feng shui likes a room where you can move freely from the door inward.

Skip if the route is already 3 feet wide all the way.
